

Homework 3 Y1 Life under water

Set: 03.3.23 Return: 30.3.23

In school we are celebrating British Science week. For British science week Y1 will be looking at life under water including animals and plants. This terms homework is for the children to create an information poster naming and identifying common animals and plants in the marine life. The children can use a variety of materials to decorate their poster. It would be amazing if they could add onto their poster the types of threats seen in marine life.
