

5 Coin Challenge

Choose a value between 10p and £1.

Try to make that amount using **EXACTLY 5** coins.

Can you make it 2 different ways (not always possible).

Challenge: can you find any amounts that you can make 3 different ways (this is rare).

For example:

5 coin challenge for **32p**:

$$10p + 10p + 10p + 1p + 1p$$

$$20p + 5p + 5p + 1p + 1p$$

$$10p + 10p + 5p + 5p + 2p$$
