

Year 3 Home Learning Summer 2

Curriculum Subject Link- Maths

Task- Create a poster or booklet about telling the time.

Set 14/06/24

Due 05/07/24

This half term we will be moving on to exploring clocks and telling the time. We have noticed that this seems to be a gap in knowledge for a lot of the class. In order to provide the children with some more knowledge on telling the time prior to the unit I am asking they spend some time at home, learning about telling the time.

I have attached a telling the time worksheet for the children to try and return attached to their poster or booklet.

Ideas for activities:

Videos on telling the time (YouTube or BBC Bitesize)

Discussing what time you do certain things at home or during the day

Children to draw their own clocks labelling the time and what they do at that time

Children to complete the attached worksheet on telling the time

Explore different types of clocks

Explore the different language related to telling the time
