# Homework 1

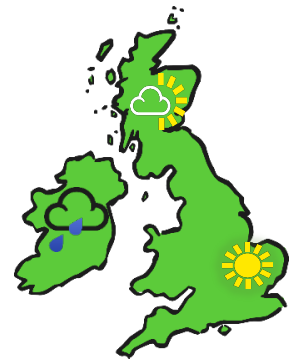

## Year 1: The UK Map

Choose a place in the UK you are interested in. You might want to choose somewhere you go on holiday or where you're family live. Completely up to you.

Can you research the weather forecast for your chosen area? You may want to use the internet or look at books to help you with your research.

Maybe you could watch the weather forecast on the television. Think about: **What do the presenters tell you? What does the map tell you? What can you see when you watch it?**

Draw the weather symbols onto your map for your chosen area. Then colour in your map labelling on the countries (England, Scotland, Northern Ireland and Wales).

- England
- Scotland
- Northern Ireland
- Wales
